

Medical Report for John Doe

Patient Information

- **Name:** John Doe
- **Age :** 58
- **Sex :** Male
- **Diagnosis:** Stable (likely **Diabetes Mellitus** or **Hypotension** given symptoms)
- **Number of Medicines Given:** 0
- **Medicines Taken:** None

Key Symptoms Used for Prediction

1. **Fainting** and **Chest Pain**: suggest cardiovascular or neurological issues.
2. **Severe Rashes**: could indicate allergic reactions or infections.
3. **Frequent Sneezing** and **Mild Coughing**: suggest respiratory issues.

Structured Report

Category	Observation
Glucose (Trips)	2
Sleep Time	1.4 hours
Phone Time	0.7 hours
Washroom Visits	1
Posture While Lying	Straight
Walking Posture	Slouched
Sleep Issues	Restless
Coughing	Mild
Sneezing	Frequent
Facial Symptoms	Sad
Rashes	Severe
Patient Fainting	Yes
Patient Chest Pain	Yes
Patient Conversation	Slurred
Diet Timings	Skipped

Time Segments Observations

- **Morning to Afternoon:** Moderate
- **Afternoon to Evening:** Moderate
- **Evening to Night:** Moderate
- **Midnight to Morning:** Low

Likely Disease Prediction

Based on the symptoms provided, the likely disease could be **Diabetes Mellitus** given the mention of **Glucose Trips**, **nausea**, and **dizziness**. However, the combination of **chest pain**, **fainting**, and **severe rashes** could also suggest other conditions such as **Hypotension** or an **allergic reaction**. Further diagnosis is required for a definitive conclusion.
